The Root Cause of the Disaster

ADDICTION RARE IN PATIENTS TREATED WITH NARCOTICS

To the Editor: Recently, we examined our current files to determine the incidence of narcotic addiction in 39,746 hospitalized medical patients* who were monitored consecutively. Although there were 11,882 patients who received at least one narcotic preparation, there were only four cases of reasonably well documented addiction in patients who had no history of addiction. The addiction was considered major in only one instance. The drugs implicated were meperidine in two patients, Percodan in one, and hydromorphone in one. We conclude that despite widespread use of narcotic drugs in hospitals, the development of addiction is rare in medical patients with no history of addiction.

Reward Systems

Game #1

- A. A sure gain of \$250
- B. 25% chance to gain \$1,000, 75% chance to gain nothing.

Adapted from: Tversky and Kahneman, Science, 1981.

18

Reward Systems

Game #1

- A. A sure gain of \$250 84%
- B. 25% chance to gain \$1,000, 75% chance to gain nothing 16%

Adapted from: Tversky and Kahneman, Science, 1981.

19

Anti-Reward Systems

Game #2

- A. A sure loss of \$750
- B. 25% chance to lose nothing, 75% chance to lose \$1,000.

Adapted from: Tversky and Kahneman, Science, 1981.

20

Anti-Reward Systems

Game #2

- A. A sure loss of \$750 13%
- B. 25% chance to lose nothing, 75% chance to lose \$1,000. 87%

Adapted from: Tversky and Kahneman, Science, 1981.

21

Human Nature

People avoid risks to ensure gains.	People take risks to avoid definite losses.	Psychology trumps probability.

24

1st Wave: Psychoanalysis

A portrait of Sigmund Freud, an elderly man with a white beard, wearing a dark suit and tie, holding a cigar.

25

2nd Wave: Boot Camps

The prototype, synanon, was founded in California in 1958 to address heroin addiction. The goal was to:

- break down defenses,
- bust through denial, and
- reshape the individual's personality.
