Ineligible Companies (formerly known as commercial interest)

An ineligible company is any entity producing, marketing, selling, re-selling or distributing healthcare products used by or on patients. The ACCME does not consider providers of clinical service directly to patients to be commercial interests.

CME Committee, Program Planning Committee, and Faculty Disclosure Information

In accordance with disclosure policies of ASAM and the ACCME, the effort is made to ensure balance, independence, objectivity, and scientific rigor in all CME activities. These policies include mitigating all possible relevant financial relationships with ineligible companies for the Planning Committees, CME Committee, MEC, and Faculty. All activity Planning Committee members and Faculty have disclosed relevant financial relationship information. The ASAM CME Committee has reviewed these disclosures and determined that the relationships are not inappropriate in the context of their respective presentations and are not inconsistent with the educational goals and integrity of the activity.
